

***Alexandria Township Social Studies
Curriculum Philosophy Statement***

The vision for the Social Studies curriculum, in Alexandria Township is to adhere to state standards by providing students with the knowledge, skills and ability they need to be informed civic participants and global citizens that contribute on the local, national and world stage.

To achieve this vision in the curriculum in Social Studies, students will:

- Examine the interaction between people and environments
- Study human technologies over the history of man
- Explore social systems
- Study cultures
- Recognize the complexities of an ever-changing world.

All of this occurs within studies involving the world, our nation, state and local community.

We will know we have achieved this vision for the curriculum in Social Studies when students can demonstrate, apply and explain their knowledge of Social Studies content through application, graphic representations, oral presentation or written assessments.
